## Software Used

## The Product

- "Care Companion" is a mobile-based application and website for Indian pet owners.
- Offering at-home veterinary services, grooming, boarding, and pet care products.
- It provides reliable and authentic information on diet, nutrition, health, grooming, and disease management, enabling pet parents to care for their pets with DIY tips and affordable solutions.

## The Problem

- Indian pet parents often face challenges accessing reliable information and affordable pet care services, leading to poor health and well-being for their pets.
- Limited access to premium pet products and medical care, especially in non-metro areas, further worsens these issues.

## The Goal

- The goal of the "Care Companion" project is to create a comprehensive mobile app/website that provides accessible, reliable pet care services and information, ensuring better health and quality of life for pets across India.

## **Research & Analysis**

**Understanding the user & their needs**

- Competitor Analysis

# User Research

## Summary

- In the "Care Companion" project, conducted comprehensive user research, including surveys and interviews with Indian pet owners, to understand their needs, pain points, and behaviors.
- Initially, assumed that the primary challenge for pet owners was the high cost of veterinary services.
- However, the research revealed that while cost is a significant barrier, lack of reliable information and access to premium pet care products in non-metro areas were equally pressing issues.
- These insights guided the design of the app/website to focus not only on affordability but also on providing trustworthy information and a wide range of accessible services and products.

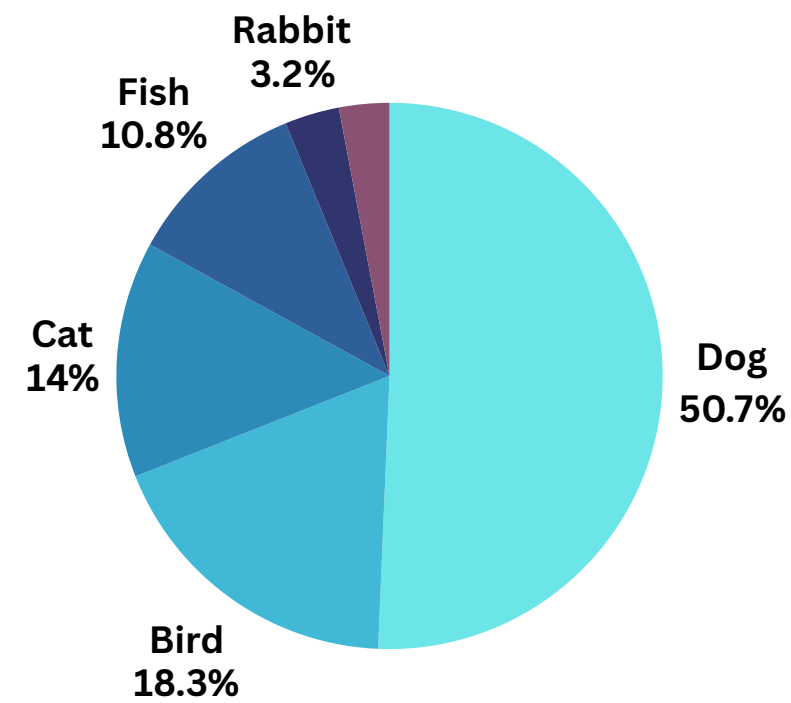

# Survey & Interview Findings

## Age Range

## Type of Pet Owned

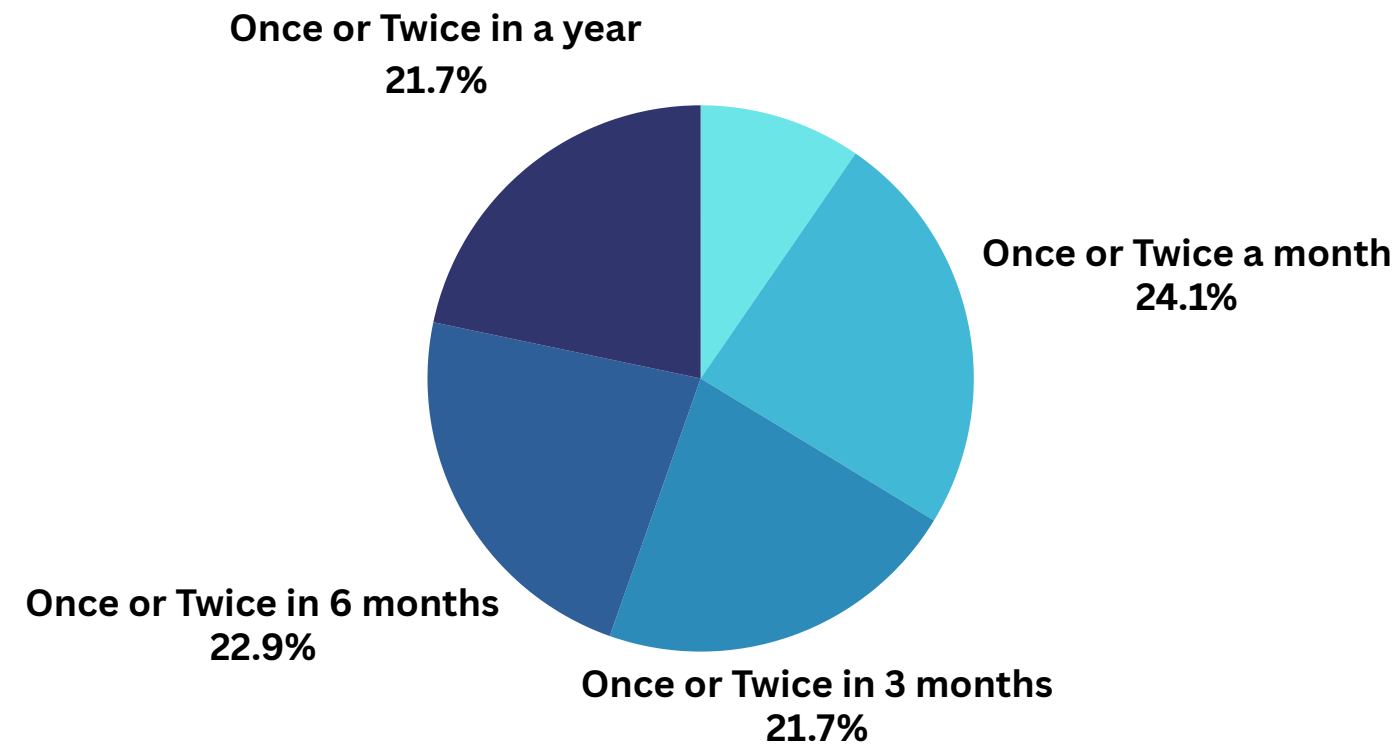

## Years of Being a Pet Owner

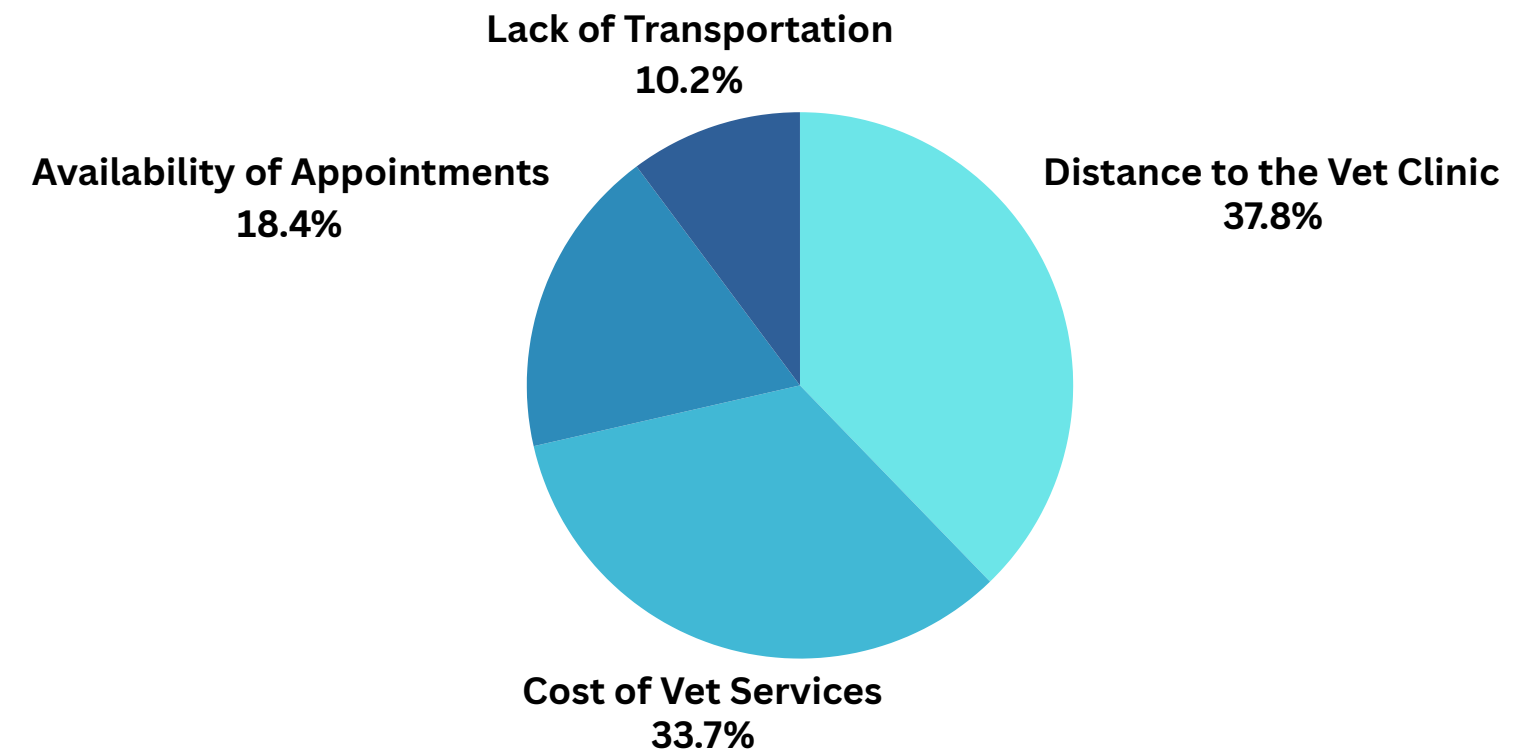

## Monthly expenses

## Vet Visit

## Reason that prevent seeking vet care

# Pain Points

1

## **Pain Point**

**High Cost and  
Inconvenience of  
Veterinary Services**

2

## **Pain Point**

**Lack of Reliable  
Information**

3

## **Pain Point**

**Limited Access to  
Premium Pet  
Products**

4

## **Pain Point**

**Difficulty in  
Managing Common  
Pet Health Issues**

1. Pet parents find regular veterinary consultations expensive and often struggle to find the time to visit a vet due to busy schedules. Additionally, some adults or children cannot take their pets to the vet due to physical limitations. To address this, the app/website will include affordable at-home veterinary consultation options, making it easier and more convenient for pet owners to access necessary medical care.
2. Many pet owners struggle to find trustworthy information on pet health, diet, and diseases, often relying on unreliable internet sources. The app/website will feature expert-verified articles and DIY tips, empowering users with accurate information to better care for their pets.
3. In non-metro areas, pet owners have difficulty accessing high-quality pet care products, toys, and medicines. The app/website will offer an online marketplace with delivery services, making premium pet products accessible to all users, regardless of their location.
4. Owners often face challenges in treating common issues like ticks or minor ailments due to lack of knowledge or resources. The app/website will provide detailed guides and easy-to-follow DIY solutions for common health problems, helping pet owners manage their pets' health effectively at home.

# Business Model Questionnaire

## What is your Business Idea?

Care Companion is an all-in-one platform providing online vet consultations, at-home pet care (grooming, pet sitting), and access to premium pet products and medicines.

## What is your target group?

Pet owners in India, especially those with busy schedules or living in smaller cities/remote areas, seeking reliable, affordable, and convenient pet care.

## What benefits do your customers gain?

- Convenience: Online vet consultations, at-home services, and products.
- Reliability: Trusted information on pet care and health.
- Affordability: Access to affordable services and products.

## Which Sector and Market are related to your company?

We operate in the pet care industry, e-commerce, and digital health, focusing initially on the Indian market.

# Business Model Questionnaire

## **What is your Long Term goal?**

To become India's leading digital pet care platform, offering comprehensive and reliable solutions nationwide.

## **What is your Market entry strategy?**

Launch locally with expansion based on demand.

## **What opportunities and threats do you see?**

- Opportunities: Growing pet ownership, demand for convenient care, and market expansion potential.
- Threats: Competition, regulatory challenges, and economic downturns.

## **How large will the investment needs be over the next 5 years?**

Investment will be based on market analysis and business growth.

## **How much profit and turnover do you plan to achieve over the next 5 years?**

Projections depend on market demand, growth potential, and scalability.

## Target Audience

**Busy Professionals & Pet Owners in Remote Areas:** Pet owners with demanding jobs or those in smaller cities who need convenient, at-home services and access to reliable online consultations and premium care options.

**First-Time & Elderly/Physically Limited Pet Owners:** New pet parents or individuals with physical limitations who seek trustworthy information, affordable services, and home-based care solutions for their pets.

**Families with Children:** Households where children help care for pets, requiring reliable, educational resources for proper pet care.

**Pet Enthusiasts:** Passionate pet owners who seek the best products, services, and health information to ensure their pets' well-being.

# SWOT Analysis

## Strengths

- **Comprehensive Services:** Full range of pet care options.
- **Convenience:** Easy access from home.
- **Trusted Information:** Reliable, expert-verified advice.
- **Growing Market:** Rising pet ownership in India.

## Opportunities

- **Expanding Market:** Increasing pet adoption.
- **Partnerships:** Potential alliances with vets and stores.
- **E-commerce Growth:** Leverage rising online shopping.
- **Market Expansion:** Enter new regions.

## Weaknesses

- **High Investment:** Significant upfront costs.
- **Brand Recognition:** Needs to build awareness.
- **Provider Dependence:** Relies on third-party service quality.

## Threats

- **Competition:** Strong existing brands.
- **Economic Risks:** Potential reduced spending.
- **Regulatory Issues:** Possible telemedicine hurdles.
- **Quality Control:** Ensuring consistent service.

# 5 W's and 1 H

## Who

Target audience includes pet owners in India, particularly busy professionals, residents in remote areas, first-time pet owners, and those with limited access to quality pet care services.

## Where

Available across India, with a focus on serving both metro and non-metro areas where access to quality pet care might be limited.

## What

Care Companion is a digital platform offering comprehensive pet care services, including online vet consultations, grooming, pet sitting, and an e-commerce store for premium pet products and medicines.

## Why

To address the challenges of accessing reliable pet care services, trustworthy information, and premium products, making it easier for pet owners to care for their pets conveniently and affordably.

## When

The app/website is designed for everyday use, whenever pet owners need reliable information, services, or products to ensure their pets' health and well-being.

## How

Care Companion operates through a user-friendly mobile app/website, where users can book at-home services, consult with vets online, access expert-verified health information, and order pet products, all from one platform.

# USER PERSONA #1

"I want the best for my pet, but balancing work and pet care is challenging."

## RUHI SHARMA

### Demographic Information

**Age:** 23 Years Old

**Education:** Bachelors in Business Administration

**Hometown:** Jaipur

**Family:** Lives with her husband and a 2-year-old Golden Retriever

**Occupation:** Marketing Manager

### Goals

Ensure her dog is healthy and happy.

Access reliable information and affordable veterinary care.

Find convenient pet care services that fit her busy schedule.

### User Statement

Ruhi is a busy professional who needs convenient and affordable pet care services because her demanding job leaves little time for regular vet visits and proper pet care.

### Frustrations

High cost and time constraints for veterinary visits.

Lack of reliable sources for pet health information.

Difficulty finding premium pet products in her area.

### Brief Story/Scenario

Ruhi works a demanding 9-6 job and finds it challenging to make time for her dog, Max. She often worries about his health but struggles to find reliable information online. With her busy schedule, regular vet visits are difficult, leading to stress about Max's wellbeing. Ruhi wishes there was a way to access trustworthy pet care advice and services without disrupting her work routine.

Stage	Actions	Feelings
Awareness	Searches for reliable pet care solutions	
Consideration	Finds "Care Companion" app/website	
Decision	Downloads and registers on the app/website	
Usage	Books at-home vet consultation, Reads health tips	
Retention	Continuously uses the app/website for various services	

# USER PERSONA #2

“Finding reliable pet care products and information shouldn't be this hard.”

## RISHABH JAISWAL

### Demographic Information

**Age:** 35 Years Old

**Education:** Masters in Computer Science

**Hometown:** Bhopal

**Family:** Lives with his wife, two kids, and a cat

**Occupation:** Software Engineer

### Goals

Keep his cat healthy with proper nutrition and medical care.

Access premium pet products easily.

Get accurate information about pet health and care.

### User Statement

Rishabh is a tech-savvy professional who needs a reliable app/website for pet care because he struggles to find trustworthy information and quality products locally.

### Frustrations

Difficulty in finding quality pet products locally.

Inconsistent information on pet health from various sources.

Managing his cat's health issues with limited resources.

### Brief Story/Scenario

Rishabh often struggles to find quality pet products and accurate information for his cat, Simba. The local stores don't offer the products he needs, and he is frustrated by the inconsistent advice he finds online. As a result, he feels uncertain about how to best care for Simba and wishes he had access to reliable resources and quality products that could be delivered to his home.

# Empathy Map

## USER PERSONA #2 RISHABH JAISWAL

Stage	Actions	Feelings
Awareness	Seeks reliable pet health information	😞
Consideration	Discovers "Care Companion" app/website	🤔
Decision	Installs and explores the app/website	😐
Usage	Orders premium pet products, Uses health tips	😊
Retention	Regularly uses app/website for products and tips	👍

# USER PERSONA #3

"I want to be well-informed about pet health to help others."

## RIYA DUGGAL

### Demographic Information

**Age:** 22 Years Old

**Education:** Final Year Student in Veterinary Medicine

**Hometown:** Delhi

**Family:** Lives with her parents and a Labrador

**Occupation:** Student

### Goals

Gain practical knowledge about pet health and care.

Access comprehensive and reliable resources for her studies.

Find affordable and convenient pet care services for her Labrador.

### User Statement

Riya is a dedicated student who needs comprehensive resources for pet health because she wants to apply her knowledge to care for her dog and excel in her studies.

### Frustrations

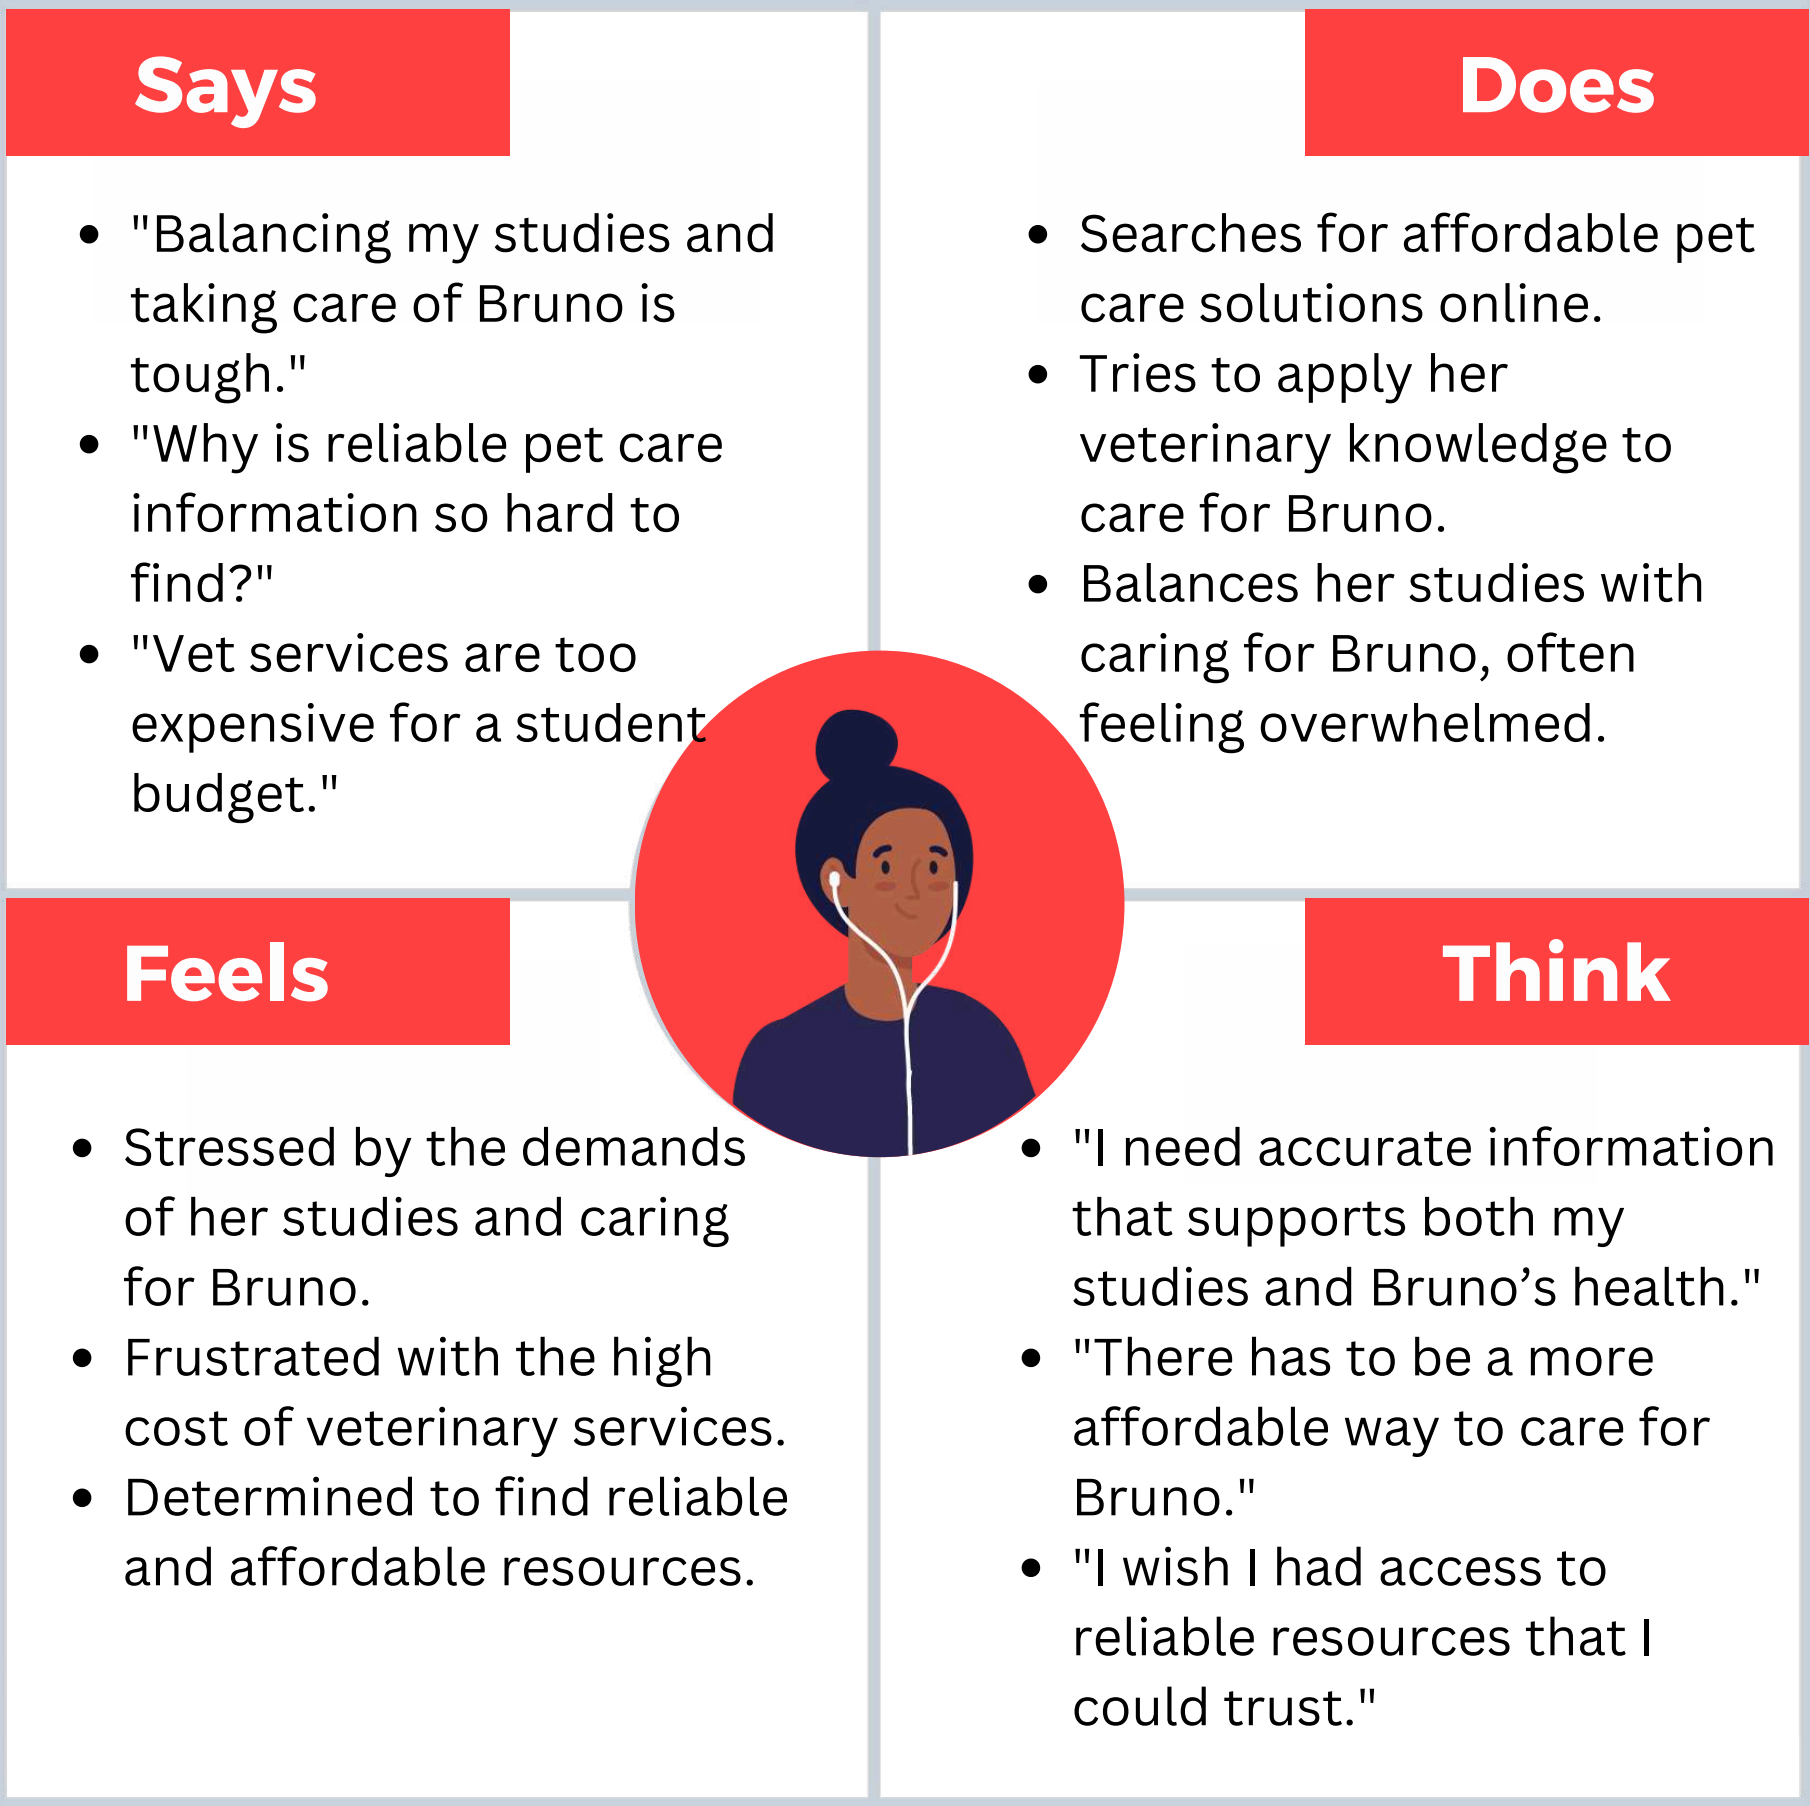

Inconsistent and unreliable information online.

High cost of veterinary services for her pet.

Balancing her studies with taking care of her dog.

### Brief Story/Scenario

Riya, a veterinary student, is passionate about learning and caring for her Labrador, Bruno. However, she finds it difficult to balance her studies with caring for Bruno, especially with the unreliable information she encounters online. The high cost of veterinary services adds to her stress, making her wish for more affordable and accessible resources that would support both her studies and Bruno's health.

Stage	Actions	Feelings
Awareness	Searches for pet health resources	😞
Consideration	Learns about "Care Companion" app/website	🤔
Decision	Downloads and sets up the app/website	😞
Usage	Reads expert articles, Books at-home vet	😊
Retention	Continues using app/website for studies and pet care	😌

# USER PERSONA #4

“My pets deserve the best care, no matter where we live.”

## KARTIK SEN

### Demographic Information

**Age:** 40 Years Old  
**Education:** Diploma in Electrical Engineering  
**Hometown:** Patna  
**Family:** Lives with his wife, two children, and a parrot  
**Occupation:** Electrician

### Goals

Ensure his parrot receives proper nutrition and health care.

Access pet care products and services easily.

Get reliable and practical advice for common pet health problems.

### User Statement

Kartik is a devoted pet owner who needs convenient access to quality pet care products and advice because local resources are limited and unreliable.

### Frustrations

Limited access to quality pet products and veterinary care in his area.

High cost and inconvenience of visiting vets.

Lack of reliable information on pet health.

### Brief Story/Scenario

Kartik lives in Patna, where access to quality pet care products and veterinary services for his parrot, Polly, is limited. He often feels frustrated by the inconvenience and high cost of traveling to the nearest vet. With limited resources in his area, Kartik struggles to ensure Polly's wellbeing and wishes there was a more convenient way to access reliable pet care advice and services.

# Empathy Map

## USER PERSONA #4 KARTIK SEN

Stage	Actions	Feelings
Awareness	Looks for quality pet products and advice	
Consideration	Finds "Care Companion" app/website	
Decision	Downloads and registers on the app/website	
Usage	Orders pet products, Reads health guides	
Retention	Regularly uses app/website for products and advice
